

Wellness Business Fluency Guide

Operations / Meeting Survival Version

The Big Picture

Lead → Consultation → Intake Forms → Provider Evaluation → Labs → Treatment → Follow-up → Membership / Retention

Recurring revenue:

- GLP■1 Programs
- TRT
- Memberships

One-time revenue:

- IV Therapy
- Aesthetic treatments

GLP■1 Basics

Examples:

- Semaglutide
- Tirzepatide

Purpose:

- Reduce appetite
- Improve satiety
- Help with weight management

Questions:

- How long do patients stay?
- Why do they drop off?
- What is average revenue per patient?

TRT Basics

TRT = Testosterone Replacement Therapy

Common symptoms:

- Fatigue
- Brain fog
- Low libido
- Reduced muscle mass

Workflow:

Consult → Labs → Review → Treatment → Follow-up

Questions:

- How often are labs repeated?
- What is retention?

IV Therapy

Purpose:

- Hydration
- Vitamins
- Recovery support

Operations thinking:

- How many chairs can run?
- Session length?
- Staff-to-patient ratio?

Peptide Basics

Categories:

- Weight management
- Recovery/healing
- Hormonal support
- Sexual wellness
- Cognitive support

Questions:

- FDA approved or compounded?
- Prescription required?
- Expected outcomes?

Aesthetics

Services:

- Botox-type treatments
- Fillers
- Microneedling
- Chemical peels
- Lasers

Business focus:

- High margins
- Repeat customers
- Social media visibility

Regulations

Know these:

- Medical director oversight
- HIPAA compliance
- Licensed providers
- Proper medication sourcing

Remember:

Operations runs the business.

Providers run medical decisions.

Meeting Survival Sheet

Ask these questions:

- Where are patients dropping off?
- What's our patient lifetime value?
- What's recurring revenue percentage?
- What are our highest-retention services?
- How are we tracking patient journeys?
- What bottlenecks exist?

30-Day Plan

Week 1:

GLP■1 + TRT

Week 2:

IV Therapy + Aesthetics

Week 3:

Peptides + Regulations

Week 4:

EMRs + KPIs + Memberships + Operations
